For almost forty years Loos & Company has manufactured and perfected its Canveyor® Cable products. Since 1973 the Canveyor® Trademark has been a recognized symbol of quality and reliability at canneries throughout the world.

Loos & Company has over 50 years experience in the cable industry. Our facilities comprise 220,000 sq. ft. in Pomfret, Connecticut. Our Wire Drawing Division operates over 40 state of the art drawing machines supported by 5 strand annealing furnaces with capacity exceeding 15 million pounds per year. Our Wire Rope Division has over 125 tubular stranders and 4 major extrusion lines that operate 24 hours per day producing over 1 BILLION feet of strand and cable each year. We rely on a knowledgeable and experienced staff of 300 to produce the strongest, most reliable cable available anywhere.

Loos & Company has pioneered the manufacturing of cable and wire rope for critical use in aerospace flight controls, exercise equipment, rigging and scaffolding. Where human life is at stake, we provide security and dependability. We have the experience you can count on.

The construction of each cable is suited for a particular application. Loos & Company manufactures all constructions of strand, cable and wire rope up to 1.25" in diameter with breaking strengths of less than 10 pounds to over 100,000 pounds. No matter what the application may be, Loos & Company makes sure you've got the exact cable for your needs.

With millions of feet of cable ready for shipping, Loos & Company has the largest cable inventory available in the industry. Come to us to reduce your out-of-service times, optimize production, and generate significant savings.
