Why EXERFLEX PRO® is the Superior Choice:

It enhances user experience.

Equipment owners will see an immediate return after installing EXERFLEX PRO®. Cable smoothness and flexibility will provide their customers with a top quality exercise experience.

It provides unmatched safety.

Each lot of EXERFLEX PRO® fitness cable by Loos & Co., Inc. is tested and certified – reducing failures under strain and lessening the risk of injury.

It reduces the cost of ownership.

Equipment owners will require fewer service calls and less downtime for their equipment. Repair professionals can eliminate the need for multiple service calls to replace inferior cables.

It ensures long cable life.

Manufacturers and owners rely on EXERFLEX PRO® for an extended service life in their equipment. Strict quality standards and extensive testing ensure that cable meets the strength and endurance required on today's fitness equipment. And we don't just say it, we certify it in writing.

Fitness Cable Hardware and Accessories

SPECIFICALLY FOR FITNESS EQUIPMENT REPAIRS.

Repair / Replacement Part	Product Description	
Ball Shanks	The MS20664 Series single shank balls are manufactured from stainless steel in accordance with MIL-DTL-781 to the strict standards of MS20664, and are certified to that standard. Loos Cableware® Division offers a full line of sizes.
